

MCQs on Software Testing Life Cycle (STLC) and V Model

1. What does STLC stand for?

- A) Software Testing Life Cycle
- B) Software Testing Logic Control
- C) Software Test Life Cycle
- D) Software Testing Level Control

Answer: A) Software Testing Life Cycle

2. Which phase of STLC involves analyzing requirement documents?

- A) Test Planning
- B) Test Design
- C) Requirement Analysis
- D) Test Closure

Answer: C) Requirement Analysis

3. In the V-Model, which development phase corresponds to Unit Testing?

- A) System Design
- B) High-Level Design
- C) Low-Level Design
- D) Coding

Answer: C) Low-Level Design

4. What is a primary advantage of Manual Testing?

- A) It is faster than automated testing.
- B) It is great for exploratory testing.
- C) It requires no human intervention.
- D) It can be executed without any test cases.

Answer: B) It is great for exploratory testing.

5. Which of the following is an example of an automation testing tool?

- A) Selenium
- B) JUnit
- C) Appium
- D) All of the above

Answer: D) All of the above

MCQs on Testing Methods

6. What does Black-box Testing focus on?

- A) Internal code structure
- B) User experience and functionality
- C) Code coverage
- D) Data flow

Answer: B) User experience and functionality

7. Which testing technique involves knowledge of the internal workings of the system?

- A) Black-box Testing

- B) White-box Testing
 - C) Grey-box Testing
 - D) Functional Testing
- Answer:** B) White-box Testing

8. What type of testing is User Acceptance Testing (UAT)?

- A) Non-Functional Testing
 - B) Functional Testing
 - C) Performance Testing
 - D) Security Testing
- Answer:** B) Functional Testing

MCQs on Non-Functional Testing

9. Which of the following is NOT a type of Non-Functional Testing?

- A) Performance Testing
 - B) Security Testing
 - C) Usability Testing
 - D) Unit Testing
- Answer:** D) Unit Testing

10. What is the main focus of Performance Testing?

- A) Functionality of the application
 - B) User interface design
 - C) System performance under load
 - D) Security vulnerabilities
- Answer:** C) System performance under load

Summary MCQs

11. What is the primary goal of the STLC?

- A) To develop software

Here are additional multiple-choice questions (MCQs) based on the content of the provided document:

MCQs on Software Testing Life Cycle (STLC)

1. Which phase of STLC involves creating detailed test cases and test scripts?

- A) Requirement Analysis
 - B) Test Planning
 - C) Test Design
 - D) Test Execution
- Answer:** C) Test Design

2. During which phase of STLC is the test environment prepared?

- A) Test Execution
- B) Test Closure
- C) Test Environment Setup
- D) Defect Reporting and Tracking

Answer: C) Test Environment Setup

3. What is the purpose of the Defect Reporting and Tracking phase in STLC?

- A) To execute test cases
- B) To analyze requirements
- C) To report and track defects found during testing
- D) To prepare the test environment

Answer: C) To report and track defects found during testing

4. What is the final phase of the STLC?

- A) Test Execution
- B) Test Closure
- C) Test Planning
- D) Requirement Analysis

Answer: B) Test Closure

MCQs on V Model

5. In the V-Model, which testing phase corresponds to the Coding phase?

- A) Unit Testing
- B) Integration Testing
- C) System Testing
- D) Acceptance Testing

Answer: A) Unit Testing

6. What is a key benefit of the V-Model?

- A) It allows for late testing.
- B) It emphasizes parallel development and testing activities.
- C) It eliminates the need for documentation.
- D) It is less structured than other models.

Answer: B) It emphasizes parallel development and testing activities.

MCQs on Types of Testing

7. Which of the following is a characteristic of Manual Testing?

- A) It is faster than automated testing.
- B) It requires automation tools.
- C) It is performed without automation tools.
- D) It is only used for large projects.

Answer: C) It is performed without automation tools.

8. What is the main purpose of Automation Testing?

- A) To perform exploratory testing

- B) To execute predefined test cases automatically
 - C) To test usability
 - D) To analyze requirements
- Answer:** B) To execute predefined test cases automatically

MCQs on Automation Testing Tools

9. Which tool is primarily used for automating web applications?

- A) Appium
- B) Selenium
- C) JUnit
- D) Jenkins

Answer: B) Selenium

10. What is the role of Jenkins in software testing?

- A) It is used for manual testing.
- B) It is an automation server for continuous integration and testing.
- C) It is a tool for writing test cases.
- D) It is used for performance testing.

Answer: B) It is an automation server for continuous integration and testing.

MCQs on Testing Methods

11. Which testing method focuses on the internal logic and structure of the code?

- A) Black-box Testing
- B) White-box Testing
- C) Grey-box Testing
- D) Functional Testing

Answer: B) White-box Testing

12. What is the main focus of Grey-box Testing?

- A) Internal code structure
- B) User experience
- C) Functionality with partial knowledge of the internal system
- D) Performance under load

Answer: C) Functionality with partial knowledge of the internal system

MCQs on Functional and Non-Functional Testing

13. Which type of testing verifies that new code changes do not break existing features?

- A) Unit Testing
- B) Regression Testing
- C) Integration Testing
- D) User Acceptance Testing

Answer: B) Regression Testing

14. What does Non-Functional Testing assess?

- A) Specific functionalities of the software

- B) Performance, security, and usability standards
- C) Code coverage
- D) User interactions

Answer: B) Performance, security, and usability standards

15. Which of the following is an example of Performance Testing?

- A) Load Testing
- B) Functional Testing
- C) Security Testing
- D) Usability Testing

Answer: A) Load Testing

Summary MCQs

16. What is the primary goal of the STLC?

- A) To develop software
- B) To ensure thorough testing from planning to closure
- C) To reduce the cost of development
- D) To eliminate the need for documentation

Answer: B) To ensure thorough testing from planning to closure

17. Which testing method is best suited for exploratory testing?

- A) Automation Testing
- B) Manual Testing
- C) Regression Testing
- D) Performance Testing

Answer: B) Manual Testing

18. What is the main focus of Functional Testing?

- A) Performance and load handling
- B) Security vulnerabilities
- C) Testing specific actions and features of the software
- D) User interface design

Answer: C) Testing specific actions and features of the software
