

Multiple Choice Questions (MCQs) on Java Servlets

1. What is a servlet?

- A) A client-side component
- B) A Java class that handles requests and generates responses
- C) A database management system
- D) A type of web server

Answer: B) A Java class that handles requests and generates responses

2. Which method is called when a servlet is first loaded?

- A) service()
- B) init()
- C) destroy()
- D) doGet()

Answer: B) init()

3. What is the purpose of the `doGet ( )` method in a servlet?

- A) To initialize the servlet
- B) To handle HTTP GET requests
- C) To destroy the servlet
- D) To handle HTTP POST requests

Answer: B) To handle HTTP GET requests

4. Which interface is used to manage session data in Java Servlets?

- A) ServletRequest
- B) HttpServletRequest
- C) HttpSession
- D) ServletConfig

Answer: C) HttpSession

5. What does the `response.sendRedirect ( )` method do?

- A) It forwards the request to another servlet
- B) It sends a temporary redirect response to the client
- C) It includes content from another resource
- D) It initializes the servlet

Answer: B) It sends a temporary redirect response to the client

6. Which of the following is NOT an advantage of servlets over CGI?

- A) Performance
- B) Resource Efficiency
- C) Simplicity
- D) Scalability

Answer: C) Simplicity

7. What is the role of the RequestDispatcher interface?

- A) To manage servlet lifecycle
- B) To forward requests to other resources or include content
- C) To handle HTTP requests
- D) To manage session data

Answer: B) To forward requests to other resources or include content

8. Which annotation is used to declare a servlet in Java?

- A) @WebInitParam
- B) @WebServlet
- C) @WebListener
- D) @WebFilter

Answer: B) @WebServlet

9. What is the purpose of the destroy() method in a servlet?

- A) To initialize the servlet
- B) To handle requests
- C) To release resources before the servlet is removed from service
- D) To forward requests

Answer: C) To release resources before the servlet is removed from service

10. How can you retrieve a parameter from an HTTP request in a servlet?

- A) Using `getParameter()`
- B) Using `getAttribute()`
- C) Using `getSession()`
- D) Using `getRequestURI()`

Answer: A) Using `getParameter()`

11. Which method is used to include content from another resource in the response?

- A) `forward()`
- B) `include()`
- C) `sendRedirect()`
- D) `getRequestDispatcher()`

Answer: B) `include()`

12. What is the default timeout for a session in Java Servlets?

- A) 10 minutes
- B) 30 minutes
- C) 20 minutes
- D) No timeout

Answer: D) No timeout (default is typically 30 minutes but can vary based on configuration)

13. Which of the following is a method of the HttpServletResponse interface?

- A) getParameter()
- B) setContentType()
- C) getSession()
- D) getRequestURI()

Answer: B) setContentType()

14. What is the purpose of the ServletConfig interface?

- A) To manage session data
- B) To provide configuration information to a specific servlet
- C) To handle HTTP requests
- D) To manage the servlet lifecycle

Answer: B) To provide configuration information to a specific servlet

15. Which of the following is a key advantage of using servlets?

- A) They are platform-dependent
- B) They are stateless by default
- C) They provide built-in support for session management
- D) They require more resources than CGI

Answer: C) They provide built-in support for session management
