

Spring Framework MCQs

1. What is the primary purpose of the Spring Framework?

- A) To provide a web server
- B) To manage the lifecycle of application objects
- C) To create mobile applications
- D) To manage database connections
- **Answer:** B) To manage the lifecycle of application objects

2. Which principle does the Spring Framework primarily utilize to promote loose coupling?

- A) Object-Oriented Programming
- B) Inversion of Control (IoC)
- C) Aspect-Oriented Programming
- D) Model-View-Controller
- **Answer:** B) Inversion of Control (IoC)

3. What is Dependency Injection (DI) in the context of Spring?

- A) A method to create new objects
- B) A way to manage database transactions
- C) A technique to provide dependencies to a class
- D) A way to handle exceptions
- **Answer:** C) A technique to provide dependencies to a class

4. Which of the following is NOT a module of the Spring Framework?

- A) Spring Core
- B) Spring ORM
- C) Spring Data
- D) Spring Web MVC
- **Answer:** C) Spring Data

5. What does the Spring AOP module support?

- A) Database connections
- B) Aspect-Oriented Programming
- C) Web services
- D) File uploads
- **Answer:** B) Aspect-Oriented Programming

6. Which annotation is used to define a Spring MVC controller?

- A) @Service
- B) @Component
- C) @Controller
- D) @Repository
- **Answer:** C) @Controller

7. What is the role of the DispatcherServlet in Spring MVC?

- A) To manage database connections
- B) To handle all incoming requests and route them to appropriate handlers
- C) To render views

- D) To manage application context
 - **Answer:** B) To handle all incoming requests and route them to appropriate handlers
8. Which of the following is a valid way to configure a Spring bean using annotations?
- A) @Bean
 - B) @Autowired
 - C) @Component
 - D) All of the above
 - **Answer:** D) All of the above
9. What is the default scope of a Spring bean?
- A) Prototype
 - B) Request
 - C) Session
 - D) Singleton
 - **Answer:** D) Singleton
10. Which annotation is used to automatically inject dependencies in Spring?
- A) @Inject
 - B) @Autowired
 - C) @Resource
 - D) @Value
 - **Answer:** B) @Autowired

Spring MVC MCQs

11. In Spring MVC, what does the Model represent?
- A) The user interface
 - B) The data and business logic
 - C) The controller logic
 - D) The database connection
 - **Answer:** B) The data and business logic
12. Which of the following is used to resolve view names in Spring MVC?
- A) ViewResolver
 - B) DispatcherServlet
 - C) HandlerMapping
 - D) ModelAndView
 - **Answer:** A) ViewResolver
13. What is the purpose of the @RequestMapping annotation?
- A) To define a service layer
 - B) To map web requests to specific handler methods
 - C) To configure database connections
 - D) To manage application context
 - **Answer:** B) To map web requests to specific handler methods
14. Which of the following is a valid way to define a view in Spring MVC?
- A) JSP

- B) Thymeleaf
- C) HTML
- D) All of the above
- **Answer:** D) All of the above

15. What is the role of the HandlerMapping in Spring MVC?

- A) To resolve view names
- B) To map incoming requests to the appropriate controller methods
- C) To manage the application context
- D) To handle exceptions
- **Answer:** B) To map incoming requests to the appropriate controller methods

16. Which of the following annotations is used to handle HTTP GET requests in Spring MVC?

- A) @PostMapping
- B) @GetMapping
- C) @RequestMapping
- D) @ResponseBody
- **Answer:** B) @GetMapping

17. What does the @ResponseBody annotation do in Spring MVC?

- A) It indicates that the return value of a method should be bound to the web response body.
- B) It maps a request to a specific view.
- C) It handles exceptions.
- D) It defines a controller.
- **Answer:** A) It indicates that the return value of a method should be bound to the web response body.

18. Which of the following is NOT a valid bean scope in Spring?

- A) Singleton
- B) Prototype
- C) Global
- D) Session
- **Answer:** C) Global

19. What is the purpose of the @Valid annotation in Spring?

- A) To validate the model data
- B) To define a bean
- C) To configure a service
- D) To map a request
- **Answer:** A) To validate the model data

20. Which of the following is a feature of Spring's internationalization (i18n)?

- A) MessageSource
- B) LocaleResolver
- C) LocaleChangeInterceptor
- D) All of the above
- **Answer:** D) All of the above
