

MCQs on Spring Boot Essentials and Usage

1. What is Spring Boot?

- A) A new programming language
- B) An extension of the Spring framework
- C) A database management system
- D) A web server
- **Answer:** B) An extension of the Spring framework

2. Which of the following is a key feature of Spring Boot?

- A) Manual Configuration
- B) Auto-Configuration
- C) Dependency Injection
- D) XML Configuration
- **Answer:** B) Auto-Configuration

3. What does Spring Boot use to run applications without a separate web server?

- A) External Server
- B) Embedded Server
- C) Cloud Server
- D) Virtual Server
- **Answer:** B) Embedded Server

4. Which of the following is NOT a Spring Boot Starter?

- A) spring-boot-starter-web
- B) spring-boot-starter-data-jpa
- C) spring-boot-starter-security
- D) spring-boot-starter-xml
- **Answer:** D) spring-boot-starter-xml

5. What is the purpose of Spring Boot Actuator?

- A) To create user interfaces
- B) To provide production-ready features for monitoring and managing applications
- C) To handle database connections
- D) To manage application dependencies
- **Answer:** B) To provide production-ready features for monitoring and managing applications

6. Which command is used to run a Spring Boot application using Maven?

- A) mvn start
- B) mvn run
- C) ./mvnw spring-boot:run
- D) mvn execute
- **Answer:** C) ./mvnw spring-boot:run

7. What annotation is used to mark the main application class in Spring Boot?

- A) @Controller
- B) @SpringBootApplication
- C) @RestController

- D) @Service
 - **Answer:** B) @SpringBootApplication
8. Which of the following is a common dependency for building web applications in Spring Boot?
- A) Spring Data JPA
 - B) Spring Web
 - C) Spring Security
 - D) Spring Batch
 - **Answer:** B) Spring Web
9. Where do you typically configure application settings in a Spring Boot application?
- A) application.xml
 - B) application.properties or application.yml
 - C) config.json
 - D) settings.txt
 - **Answer:** B) application.properties or application.yml
10. What is the default port on which a Spring Boot application runs?
- A) 8080
 - B) 8000
 - C) 3000
 - D) 5000
 - **Answer:** A) 8080

MCQs on Spring Boot CRUD Application

11. In a Spring Boot CRUD application, which HTTP method is used to create a new resource?
- A) GET
 - B) POST
 - C) PUT
 - D) DELETE
 - **Answer:** B) POST
12. Which annotation is used to define a REST controller in Spring Boot?
- A) @Controller
 - B) @Service
 - C) @RestController
 - D) @Component
 - **Answer:** C) @RestController
13. What is the purpose of the @GetMapping annotation?
- A) To handle POST requests
 - B) To handle GET requests
 - C) To handle PUT requests
 - D) To handle DELETE requests
 - **Answer:** B) To handle GET requests
14. In the UserController class, how is a new user ID assigned?

- A) By using a random number generator
- B) By incrementing the size of the user list
- C) By fetching from the database
- D) By using a UUID
- **Answer:** B) By incrementing the size of the user list

15. Which HTTP method is used to update an existing resource in a Spring Boot application?

- A) GET
- B) POST
- C) PUT
- D) PATCH
- **Answer:** C) PUT

16. What is the return type of the `getAllUsers()` method in the `UserController`?

- A) User
- B) String
- C) List
- D) void
- **Answer:** C) List

17. Which of the following is used to delete a user in the `UserController`?

- A) `@PostMapping`
- B) `@GetMapping`
- C) `@PutMapping`
- D) `@DeleteMapping`
- **Answer:** D) `@DeleteMapping`

18. What is the purpose of the `@PathVariable` annotation?

- A) To bind request parameters
- B) To bind path variables in the URL
- C) To bind request body
- D) To bind session attributes
- **Answer:** B) To bind path variables in the URL

19. In the application properties file, which property is used to set the server port?

- A) `server.port`
- B) `spring.port`
- C) `application.port`
- D) `web.port`
- **Answer:** A) `server.port`

20. What is the main purpose of the `User` model class in the CRUD application?

- A) To handle HTTP requests
- B) To represent user data
- C) To configure application settings
- D) To manage database connections
- **Answer:** B) To represent user data
